

L 7

Meissner Lop

Ring Size H	Points
1) Type	20
2) Weight	20
3) Head & Ears	15
4) Fur	15
5) Colour	10
6) Silvering & evenness	15
7) Condition	5
Total	100

- Type** – Not as stocky and compact as the French Lop. The body is longer with the back nicely arched and well rounded at the rear. The legs are strong and straight. A small well formed dewlap is permissible in older does.
- Weight** - Ideal weight 4.5kg (10lb) to a maximum weight 5.5kg (12lb). Minimum weight 3.5kg (7.3/4lb)

kg	3.5 - 3.75	4.0 - 4.25	4.5	over 4.5kg		
lb	7.3/4 - 8.1/4	9 - 9.1/2	10	10		
Points	15	16	17	18	19	20
- Head and Ears** – The head has a beautiful arched profile. The forehead is broad but not as massive as that of the French Lop. The head of the doe is somewhat weaker than that of the buck. The ears rise from the crown and are carried with the inside aspect close to and facing the cheeks. They should hang down straight, behind the eyes, without being carried forward or backwards. Ear length 38-42cm (15-16 in)
- Fur** – The fur is of medium length approximately 3cm (1.1/4in) and quite dense. Evenly interspersed with guard hairs.
- Colour** – All self colours and yellow.
- Silvering and Evenness** – Top colour to be evenly silvered over the whole body. It is permissible for the nose, muzzle and toes to be less strongly silvered.
- CONDITION** - as standard for all breeds.

FAULTS - Minor deviation in type. Poor ear carriage. Deviation from ideal ear length.

DISQUALIFICATIONS - Severe deviation in type. Adult ear length less than 36cm and over 42cm. Horizontal or partly erect ears. Too short in body. Completely dark head without any silvering. Plus standard faults and disqualifications.
